

MSP PROGRAM

Allowing your MSP
business to progress

ESET MSP Program is designed around your needs

We've talked to our MSP partners, and we understand that **flexibility and profitability** is key to their progress. This program has been designed to make your goals achievable.

It offers a **unified ecosystem**, a variety of **integration options**, and a **flexible ordering and billing process**. Our MSP-optimized solutions are easy to use, minimize daily operations, and enable you to provide trusted, top-rated security to your customers.

Boost your profits with ESET's MSP-friendly model

✓ NO NEED TO WORRY ABOUT SEAT-COUNT FLUCTUATIONS

You only pay for what you actually use on any particular day. There is no flat-rate payment, and no long-term commitment.

✓ YOU MANAGE YOUR OWN CUSTOMERS' SEAT COUNTS

With a single, unified account you get maximum freedom and flexibility to add or remove seats, and you can make other administrative changes in just a few clicks.

✓ ATTRACTIVE UPSELL OPPORTUNITIES

With ESET PROTECT Platform, moving to a higher tier can add significant extra value, without major cost increases.

✓ YOU CAN TRACK LICENSE USAGE IN REAL-TIME

See where you stand at a granular per-customer, per-day level whenever you need to. At the same time, you can monitor your performance at any time during the month.

✓ YOU'RE IN CONTROL

Enjoy a self-service marketplace experience. All ordering and licensing operations can be performed by you, with no need to wait for approval, or contact ESET.

✓ TIER-BASED VOLUME PRICING

Allows you to boost your profits based on the number of clients you cover. The more licenses you sell, the better the unit price you get.

Stay in control with ESET PROTECT Platform

ESET PROTECT is the world's most formidable **cyber threat prevention, detection and response platform**. It can be deployed via **cloud or on-premises** installation, with almost equal functionality, depending on your operational needs.

The XDR-enabling component of the ESET PROTECT Platform provides extended endpoint visibility, threat hunting and incident response designed to mitigate immediately any security issue in your network.

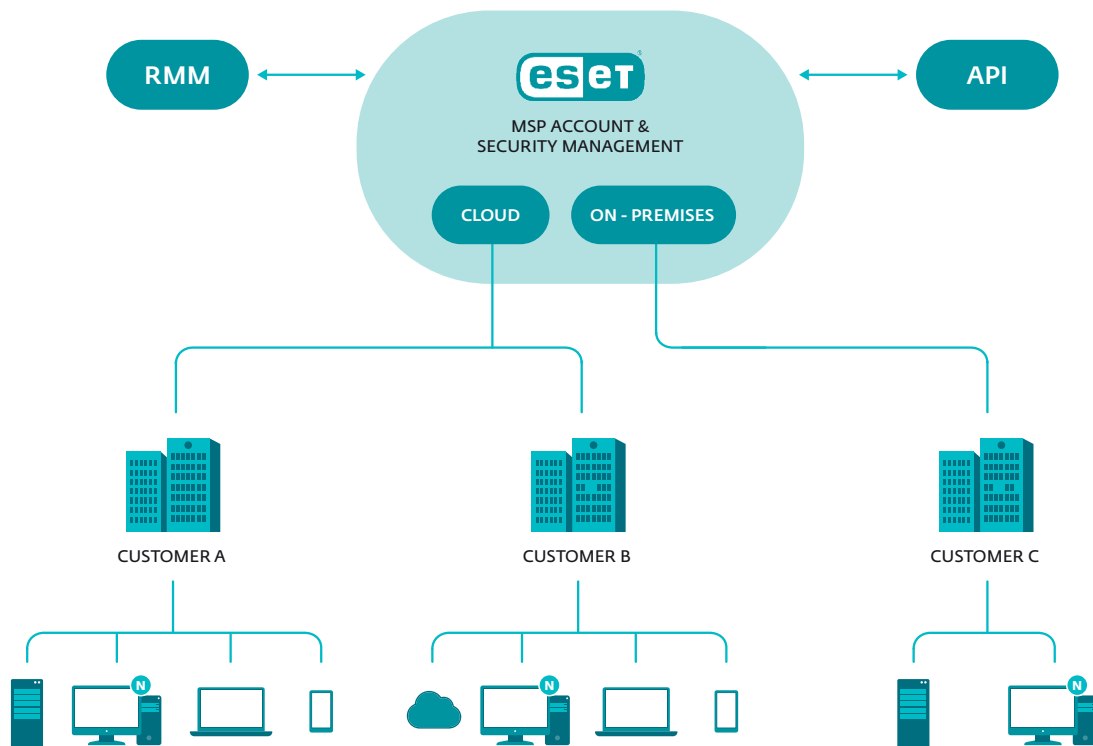

Cybersecurity Services from deployment to upgrade and premium support

Unified MSP Ecosystem

ESET MSP Administrator (EMA) is easy to access via the internet. It is closely integrated with ESET PROTECT Platform via a single sign-on, **automatically synchronizing your customer structure**. You can review your customers' security postures, investigate incidents, mitigate threats and respond immediately via a single screen. EMA features a powerful API, allowing seamless integration with your existing business systems.

Multitenancy allows you to manage multiple customers from a single console while ensuring that customers who require access cannot see the data of your other customers.

Thanks to its **agent-based infrastructure**, you can deploy the management agent on systems with different security products, run scripts, execute remote commands, list installed software and patch operating systems.

ESET plugs straight into your RMM

If you're an MSP that works with an RMM or PSA, we've got you covered. At ESET, our focus is to bring you best-of-breed, in-depth integrations with top vendors like ConnectWise, Solarwinds, Datto, Kaseya and others. Check out our plugin page [here](#).

DIRECT PLUGINS

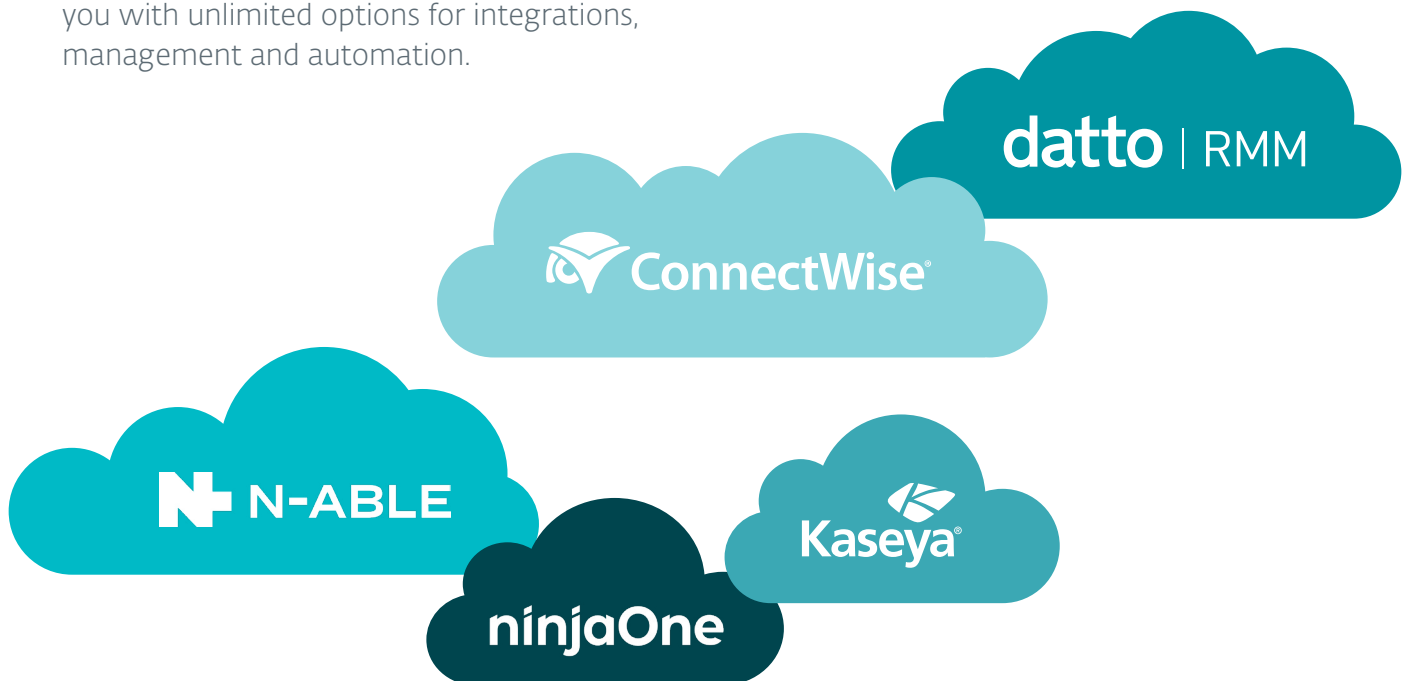

Our unique Direct Endpoint Management (DEM) plugins work without the need for an intermediary console. If you're using our DEMs, your RMM will talk directly to the ESET agent, and vice versa.

A POWERFUL API

ESET MSP Administrator portal has a powerful and fully documented API, which provides you with unlimited options for integrations, management and automation.

BROAD SECURITY COVERAGE

With our plugin you can manage Windows and macOS clients plus ESET security on Windows servers. In case your RMM is not directly supported, use the eRMM script in ESET endpoint products to integrate your platform straight away!

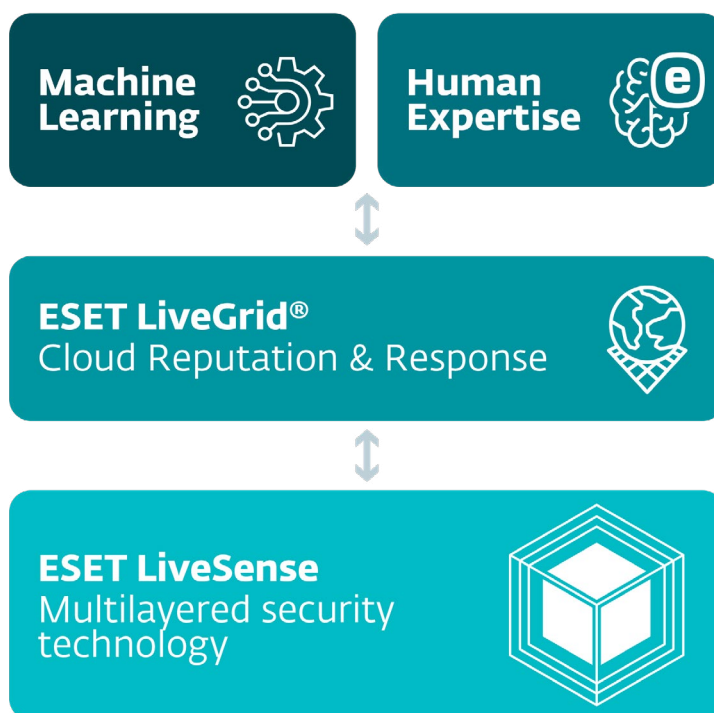

Rely on leading cybersecurity technology

A single layer of defense is not enough in today's constantly evolving threat landscape. ESET LiveSense, our multilayered security technology, powers the ESET PROTECT Platform.

This works in combination with our machine learning expertise, cloud reputation system, and our people.

ESET was among the earliest adopters of cloud technology, which powers the ESET LiveGrid® global reputation system to constantly update threat intelligence.

Advances like these are the work of ESET's core strength: our team of dedicated people, who have been researching malware and innovating technology for more than three decades.

About ESET

ESET provides security solutions for more than 10,000 MSPs worldwide. For more than 30 years, we have been developing industry-leading IT security software and services that deliver comprehensive, multilayered protection against cybersecurity threats. ESET has long pioneered machine learning and cloud technologies that prevent, detect and respond to malware. A privately owned company, ESET promotes scientific research and development worldwide.
