ESET

SECURITY SOLUTIONS
FOR EDUCATION

Why you need it

Spend your time supporting your students, faculty, staff and education initiatives—not worrying about cybersecurity issues.

ESET's solutions for K-12 and higher education are designed for today's challenges—from securing virtual classrooms and ensuring safe distance learning to meeting regulatory compliance and keeping costs in line.

In addition, these solutions are compatible with both Windows and macOS for seamless integration into your existing systems and are manageable via the cloud or on-premises.

ESET: Tailor made for education

While requirements vary greatly between K-12 and higher education settings, our products address the challenges common to all institutions, including:

- Protection of sensitive data including employee and student records, medical information, Social Security numbers and payment accounts.

- Complex compliance, auditing and reporting requirements driven by CIPA, HIPAA, PCI and more.

- Tight budgets that limit spending on new hardware, software and upgrades.

- Equipment ranging from legacy hardware and multiple OSes to the latest mobile devices.

- Users and equipment in a range of locations, with the need to protect both school-issued and personal devices.

ESET PROTECT:
Superior protection, speed and versatility

Our new **ESET PROTECT** bundles deliver the ultimate in protection and convenience. For education clients, we recommend **ESET PROTECT Advanced**, which includes:

CENTRALIZED MANAGEMENT: Convenient centralized remote management, via the cloud or on-premises, enables you to manage thousands of endpoints across multiple locations. Quickly and easily customize and maintain logs and run reports as needed.

CLOUD-BASED SANDBOXING: ESET Dynamic Threat Defense uses cloud-based sandboxing to detect and analyze never-before-seen threats. Protects against ransomware, targeted attacks, advanced persistent threats (APTs), zero-day exploits and other sophisticated malware. Your entire organization is protected as soon as the file is submitted—before it can reach your network, endpoints and users.

FULL DISK ENCRYPTION: This robust encryption solution for system disks, partitions or entire devices secures data and supports legal compliance. By securely encrypting the personal data records you hold, your organization can better protect itself in the event of a system breach. Such incidents are much less likely to be considered a compliance failure by regulatory authorities if data is properly encrypted.

ESET Business Solutions for Education

ESET PROTECT solutions include the following components

- **Endpoint protection**
  Advanced multilayered protection for computers, smartphones and virtual machines.

- **Server security**
  Real-time protection for data passing through all general servers.

- **Remote management console**
  Single-pane-of-glass remote management; available via cloud or on-premises.

Additional solutions for K-12 and higher education include:

- **Endpoint detection and response** for increased visibility into emerging threats, risky employee behaviors and unwanted applications.

- **Two-factor authentication** to restrict access to networks, devices and data and meet compliance requirements.

- **Online cybersecurity awareness training** for faculty and staff to reduce risks posed by phishing, social engineering and other scams.

Testimonials

"We chose ESET because of deployment, cost of the suite, and overall effectiveness. Not to mention the awesome 'low footprint' of ESET. In the past three years, we have caught and stopped over 140,000 infections. Protection of that level speaks for itself."

—Eric Wells, Director of Technology, Muskogee Public School District **SEE CASE STUDY**

"ESET allows us to have greater uptime and reliability of our workstations, in addition to protecting the district's computer network from threats."

—Michael DiLalla, Senior Network Technician, Penfield Central School District **SEE CASE STUDY**

"Both our end users and our IT department are extremely satisfied with our ESET experience."

—Tzafrir Haring, Senior Network Technician, Webster Central School District **SEE CASE STUDY**
